Texwipe's SolvSat™ Canister system contains pre-wetted, AMS 3819 qualified, wipers designed for industrial and precision cleaning applications often found in the Aerospace, Printing, Automotive and Marine industries.

Engineered for Safety.

SolvSat™ canisters and wipers provide a system for dispensing a pre-wetted wipe as needed for the task. By eliminating the need to dispense bulk solvents, spill risk is eliminated and employee exposure to hazardous vapors is reduced. When the last wipe in the container has been used, simply replace with a new refill pouch.

Designed for Convenience.

SolvSat's color-coded canisters optimize the use of solvents in your processes by delivering the right amount for the task, eliminating overspray and waste. Reduce the inventory and clutter of squirt bottles and rags on the shop floor and cabinets with these pre-wetted wipers.

Choice of Solvents.

SolvSat™ refill pouches are packaged in solvent resistant non-woven roll accurately saturated with Acetone, IPA, Toluene or MPK. Available in 6" x 9" and 12" x 16" wiper sizes.
